

STATE OF IOWA
BEFORE THE IOWA UTILITIES BOARD

IN RE: INTERSTATE POWER AND LIGHT COMPANY	DOCKET NO. EEP-2012-0001
--------------------------------------------------------------------	---------------------------------

NET TO GROSS PLAN ADDITIONAL INFORMATION

COMES NOW, Interstate Power and Light Company (IPL) and submits the following additional information on net-to-gross research plan (NTG Plan) previously filed by the Office of Consumer Advocate (OCA) on September 1, 2016 in the 2014-2018 Energy Efficiency Plan dockets, EEP-2012-0001, EEP-2012-0002, and EEP-2013-0001, of IPL, MidAmerican Energy Company, and Black Hills Energy (collectively, the Investor Owned Utilities or IOUs).

The OCA filed the September 1, 2016 NTG Plan on behalf of, and pursuant to its role as a member of, the NTG Oversight Committee, which was formed by the IOUs, the OCA, and the Iowa Environmental Council and Environmental Law and Policy Center (Environmental Intervenors) for the purpose of conducting a collaborative review of net-to gross (NTG) in preparation of the 2019-2023 Energy Efficiency Plan (EEP) filings.

The September 1, 2016 NTG Plan states on page 3 that the individual IOUs would, by December 1, 2016, file information about any additional NTG research that would be conducted as part of the Evaluation, Measurement and Verification phase of the currently pending 2014-2018 EEPs.

In accordance with the OCA's September 1, 2016 filing, IPL states that it does not intend to conduct additional NTG research at this time.

In addition, in its April 8, 2016 Order, the Iowa Utilities Board (Board) required that the NTG Plan contain, among other things, cost estimates for the NTG research conducted by program or measure, and how that cost will be allocated to each IOU. (See April 8, 2016 Order, page 9, ¶ 1.e).

In response to the Board's April 8 Order, IPL reports that the NTG research by program or measure can be found in the detailed work plan prepared by IOUs' consultant, Dunskey Energy Consulting (Dunskey), which was filed with the Board by OCA on behalf of the NTG Oversight Committee on October 25, 2016. Dunskey will perform primary research on Residential Prescriptive Rebates, Custom Rebates and Non-Residential Prescriptive Rebates on behalf of IPL. Further, Dunskey will collect and review secondary research on Home Energy Assessments, Change-A-Light, Appliance Recycling, Commercial New Construction and New Home Construction programs. The estimated cost of the NTG research for all IOUs totals \$230,105. IPL's share of those estimated costs is based on IPL's percentage of gas and electric customers served by IOUs in the state of Iowa, and equals \$78,028.

As the next step in implementing the NTG Plan, on September 1, 2017 the NTG Oversight Committee will file a copy of Dunskey's final NTG report, which will contain recommendations on reporting net values and/or market-based adjustments and a plan for periodic review of NTG values.

DATED this 1st day of December, 2016.

Respectfully submitted,

**INTERSTATE POWER AND LIGHT
COMPANY**
